07578555334

Core Skills

Oracle Certified Java developer with broad experience in application servers (**JBoss**), database querying (**JPA**), data encryption (**Voltage**), unit testing (**JUnit** & **Mockito**) and deployment to cloud infrastructure (**RedHat Openshift & Splunk**). This knowledge has been tested during my jobs at **IBM** and **American Express**.

Intermediate experience with low-level *C*, *ARM assembly* and *JavaScript*. Open-source contributions can be found at github.com/gmtuca.

Work Experience

American Express, UK – Software Engineer

International Issue Management (IIM)

Aug 2016 – present

- Engineer at the *International Issue Management* team, building a *JBoss* application for data extraction, analytics and reporting of operational issues. Significantly reduced infrastructure costs, enhanced monitoring capabilities and improved security by implementing end-to-end encryption. This involved frequent communication with an international, large-scale **Agile** team.
- The fine-grain, valuable data collected and produced by my tools has been used to
 prevent and remediate high priority risks, with potential to save the company
 millions in revenue.

Global Network Authorizations (GAN)

Sep 2016 – July 2017

- Developer in *GAN*, the first point of contact and **most critical application in the Amex payment system**, which handles the flow transactions.
- Implementation changes written by me currently run in **thousands of daily transactions**, in multiple countries, under a 99.9999% availability Java platform. This resulted on revenue generation of hundreds of thousands of dollars.
- As a side project, proposed and developed Java Excel Mapper (JEXM), the soonto-be first mid-large scale Open-Source project at American Express.

IBM, **UK** – *Software Engineer Intern*

Sep 2014 – July 2015

- Software engineer in the IBM WebSphere Application Server (WAS) team with responsibility of improving quality of the product by producing reports, building predictive models and analysing the results of years of automated tests.
- Developed a Java application for collection and visualization of code delivery patterns and test data, allowing for quick resolution of defects and increased reliability of WAS across different Operating Systems and Java Virtual Machines.
- As a result of my work the number of supported platforms increased by 15%, with an average test passrate of 99.7% and build times were reduced by over 5 hours

through targeted testing. Consequently *WAS Liberty* became the **first closed-source application server in the market to reach full Java EE 7 compatibility.**

Certifications

Oracle Certified Associate (1Z0-808) – Java SE 8 Programmer I

Contificate even result: 92 F94

Feb 2017

Certificate exam result: 92.5%

Oracle Certified Professional (1Z0-809) – Java SE 8 Programmer II

Oct 2017

Certificate exam result: 83.0%

Education

• Fluency in *English*, *Portuguese* and *Italian*. Intermediate level of *Spanish*.

University of Manchester, UK – BSc Software Eng.

Sep 2012 – July 2016

- First-class with honours result: 79.0%
- Final year project: development of a Database Management System on SpiNNaker, a hardware component made of thousands of processors originally used to simulate human brain activity. The research project, funded by the European Research Council, had to account for complex issues such as concurrency, shared resources and unreliable packet exchange. The project and dissertation can be found at git.io/v11aS and git.io/v11r5 respectively.

Fondazione Torino, Brazil – Secondary School

Sep 2008 – July 2012

- **GPA 5.0** result: **91.0% (top 5%)**
- Presented honourable thesis on *Infinity and the Expansion of the Universe* to a board of examiners and over 30 spectators.

Additional Responsibilities

Manchester Dodgeball Society – Team captain & referee Sep 2013 – Sep 2014

- Role of promoting events, organizing tournaments and coaching team during play.
- Had to ensure the society's welfare by discussing relevant financial and marketing decisions with the committee.
- I am a **certified UK referee** and volunteered during the *2014 Dodgeball World Cup* in Manchester, which had participation of over 20 international teams.
